REQUIREMENTS

Pursuant to IDAPA 58.01.06, approval of location restrictions by the Department of Environmental Quality (DEQ) is required for all new and lateral expansions of non-municipal solid waste management facilities. Existing facilities are required to comply with the siting requirements within five years from April 26, 2002. Existing facilities may submit existing approvals that demonstrate compliance with applicable siting requirements. Site approval process may occur prior to or concurrently with, design (if applicable), operations, closure and post-closure approval process. Siting approval is required prior to construction of the facility. Approval from local authorities may be required. It is recommended that the applicant contact the county and/or city in which the facility will be located.

PRE-APPLICATION MEETING

It is very important that the applicant meet with the appropriate DEQ regional office staff before the site approval application is submitted. A tour of the site is very helpful in identifying any possible concerns that may need to be addressed in the application. A pre-application meeting with DEQ, the local Health District and local government is recommended. This will help ensure that there is compliance with location restrictions and operational requirements and that sufficient information is submitted to allow for a timely review. It is advantageous to DEQ, the local health district, local government and the applicant to move this process forward as quickly as possible.

REQUIRED SUBMITTALS

Please fill out the attached form, complete the questionnaire, and attach at a minimum, the indicated documentation to support the location restriction determinations. Original and 2 copies of the application and supporting documents should be sent to the appropriate DEQ Regional Office listed below.

INCOMPLETE INFORMATION MAY CAUSE DELAY IN THE APPROVAL PROCESS
**DEQ REGIONAL OFFICE CONTACTS:**

Please send the original and 2 copies of the completed application and supporting documents to the appropriate regional office below:

NON-MUNICIPAL SOLID WASTE SITE APPROVAL APPLICATION

I. GENERAL INFORMATION - Please complete (type or print) the General Information section and/or attach Pre-Application Meeting Information if completed.

Applicant's Name ________________________________________________________________

Applicant's Signature ____________________________________________________________

Application Date ________________________________________________________________

Name of Site ______________________________________________________________________

Location of Site _________________________________________________________________

Total Acreage of Site _____________________________________________________________

Legal Description ________________________________________________________________

Property Owner of Record _________________________________________________________

Address: ______________________________________________________________________

Telephone: _____________________________________________________________________

(Attach written approval from owner to use site for stated purpose, if owner is different from applicant)

Operator of Proposed Facility ______________________________________________________

Address: ______________________________________________________________________

Telephone: _____________________________________________________________________

Contact Person Regarding This Application

Name: _________________________________________________________________________

Address: ______________________________________________________________________

Telephone: _____________________________________________________________________

04/08/20
This application is for a:

______ NEW FACILITY

______ LATERAL EXPANSION of existing facility

This application is for what type of facility?

_____ Construction & Demolition Waste Landfill

_____ Transfer Station

_____ Industrial Landfill

_____ Compost Facility

_____ Waste Tire Collection Site

_____ Petroleum Contaminated Soils Processing Site

_____ Waste Septage Disposal Site

_____ Other (please specify) _________________________________

Proposed Tier Classification

_____ Tier II

_____ Tier III

What is the composition of the waste material to be managed, processed or disposed?

II. LOCATION RESTRICTIONS - SITE APPROVAL
Instructions: These questions relate directly to the location restrictions for non-municipal solid waste management facilities. Answer the questions below and, in an attached report, include all supporting documents and describe how they were used to make the determinations. This documentation should include, but not be limited to, maps, technical reports, letters, documentation of phone conversations, computer models, on-site investigations, analyses, etc.

01 GENERAL SITING REQUIREMENTS - All Tier II and III solid waste management facilities regulated under the Solid Waste Management Rules, IDAPA 58.01.06 shall comply with items a through d.

a. Flood Plain Restriction
Is the facility located within a one hundred- (100) year floodplain? Provide a copy of the applicable Federal Emergency Management Agency (FEMA) map showing the location of the disposal site with respect to the 100-year flood boundary. If a map is not available for the proposed site location, a site evaluation report and a letter of confirmation, stamped by a registered professional engineer or registered professional geologist, may be required.

_____ YES  _____ NO

If yes, provide information demonstrating that the facility will not restrict the flow of the one hundred (100) year flood, reduce the temporary water storage capacity of the floodplain, or result in a washout of solid waste so as to pose a hazard to human health and the environment. If the site is located within the 100-year floodplain, the demonstration noted above must be prepared and stamped by a registered professional engineer or registered professional geologist, as appropriate.

Information supporting this section of the application can be found in the attached documentation as follows: (document name, page number, etc.)

______________________________

b. Endangered or Threatened Species Restriction
Is the facility located such that it does not cause or contribute to the taking of any endangered or threatened species of plant, fish, or wildlife or result in the destruction or adverse modification of the critical habitat of endangered or threatened species as identified in 50 CFR Part 17?

_____ YES  _____ NO

Information supporting this section of the application can be found in the attached documentation as follows: (document name, page number, etc.)

______________________________

c. Surface Water Restriction
Is the active portion of the facility located such that the facility shall not cause contamination of surface water, unless such surface water is an integral part of the facility's operation for storm water management and/or leachate management? Provide at a minimum, a scale map showing the site location and distances to the nearest surface water bodies. A USGS 7.5-minute topographic map is suggested.

_____ YES  _____ NO

Information supporting this section of the application can be found in the attached documentation 04/08/20
as follows:  (document name, page number, etc.)  

**d. Parks, Scenic or Natural Use Restriction.**

Is the facility located within one thousand (1,000) feet of any state or National Park, or land reserved or withdrawn for scenic or natural use? *Provide a scaled map showing the disposal site location, and distances to the nearest state or National Park, scenic area, and natural use area.*

____ YES  ____ NO

Information supporting this section of the application can be found in the attached documentation as follows:  (document name, page number, etc.)  

**Note - Items e through g are required for all Tier II facilities and Tier III facilities except Tier II transfer stations, CESQG Management facilities and incinerators. Item h is required for all Tier II and Tier III NMSW landfills.**

**e. Ground Water**

Is the active portion of the facility located, designed or constructed such that the facility shall not cause contamination of a drinking water source or cause contamination of the ground water?

Provide information demonstrating that the facility will not degrade ground water. *Minimum documentation shall include well driller's reports, boring logs, and/or site specific environmental assessment information sufficient to demonstrate depth to the uppermost ground water bearing zone and the composition, thickness and characteristics of overlying soil and rock materials. Depending on the nature of the waste to be disposed at the facility and the vulnerability of the ground water beneath the site, best management practices and best practical methods, including special engineering designs, may be required to ensure protection of the ground water.*

____ YES  ____ NO

Information supporting this section of the application can be found in the attached documentation as follows:  (document name, page number, etc.)  

**f. Geologic Restriction**

Is the NMSW Management Facility's active portion located on land that would threaten the integrity of the design? *Minimum documentation must include a description of the site characteristics sufficient to provide a clear understanding that the site is stable.*

____ YES  ____ NO

If YES, provide information demonstrating that engineering measures have been incorporated into the NMSW Management Facility design to ensure the integrity of the structural components of the NMSW Management Facility will not be disturbed. Factors to consider can include, but not be limited to, on-site and local soil conditions, on-site or local geologic or geomorphologic features, on-site or local human-made features or events? A *site evaluation and letter of confirmation from a registered professional engineer or registered professional geologist may be required.*
g. Property Line Restriction

Is the facility located so that the active portion is any closer than one hundred (100) feet to the property line of adjacent land? Provide at a minimum, a scaled map showing the active portion of the disposal site, the distance from the active portion to the site property boundaries, and the location and land use of adjacent properties. A 100-foot buffer zone must be maintained between the active portion of the solid waste facility and adjacent properties.

_____ YES  _____ NO

h. Wetlands

Is the facility located in a wetland? Documentation may include a copy of the applicable National Wetlands Inventory map and letters from the U. S. Army Corps of Engineers and the National Resource Conservation Service that provide a wetlands determination.

_____ YES  _____ NO

If YES, provide information demonstrating that:

1. No practical alternative exists?

2. The facility will not cause or contribute to violations of the state water quality standards?

3. The facility will not violate any applicable toxic effluent standards or prohibitions under Section 307 of the federal Clean Water Act?

4. The facility will not cause or contribute to significant degradation of the wetlands?

5. No net loss of wetlands will result?

02. SITE MAP - In addition to items a through d and any other applicable items e through g, owners and operators shall include as part of the siting application a scaled map. Please attach a scaled map depicting the following:

a. Highways, roads, and adjacent communities;
b. Property boundaries;
c. Total acreage of the site;
d. Off-site and on-site access roads and service roads;
e. Types(s) of land use adjacent to the facility and a description of all facilities on the sites;
f. All water courses, ponds, lakes, reservoirs, canals, irrigation systems, and existing water supplies, within one-quarter (1/4) mile of the proposed facility property lines;
g. High tension power line right-of-way, fuel transmission pipeline right-of-way, and proposed or existing utilities;
h. Proposed or existing fencing;
i. Proposed and existing structures at the facility and within five hundred (500) feet of the facility boundary. This shall include location of employee building and scales (if provided);
j. Direction of prevailing winds.

Professional Engineer or Professional Geologist Certification

I am a registered professional engineer or registered professional geologist in the State of Idaho and qualified to evaluate and certify compliance with the location criteria for a non-municipal solid waste management facility. I certify that this application was prepared by me or under my direct supervision.

Signature, seal, and date  ________________________________
